

This hunter-gatherer is bringing back fruit for her tribe

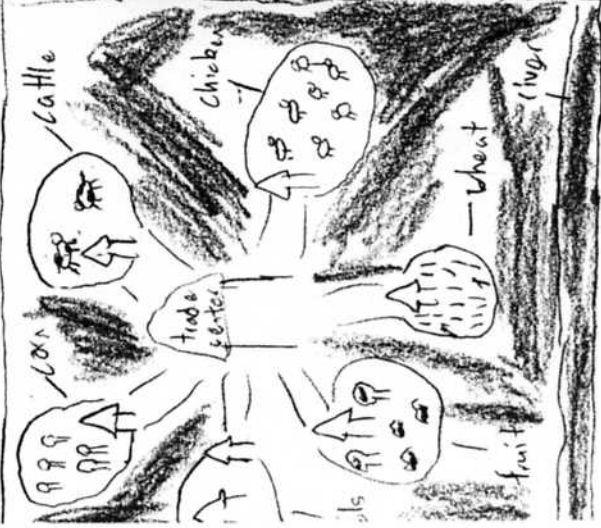

This guy is teaching his son how to raise cattle

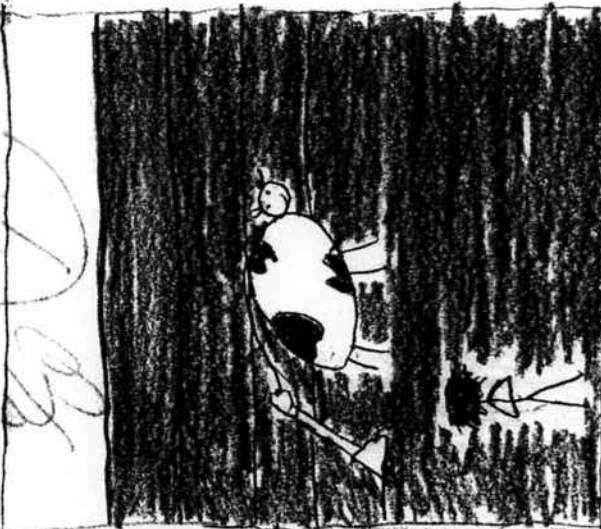

This man has a big farm going well.

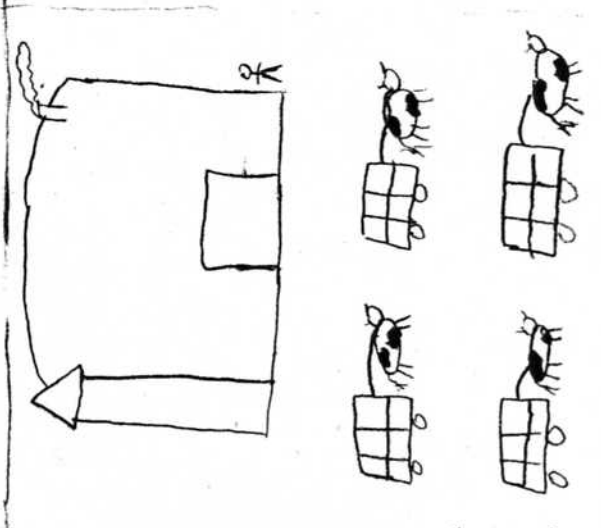

The family special is in eggs

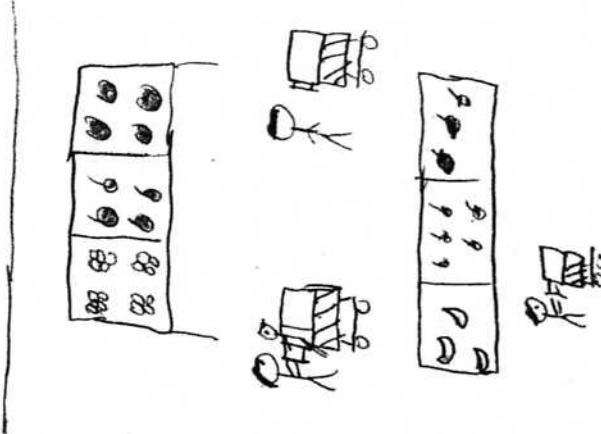

Each house specializes in a certain thing, centering the

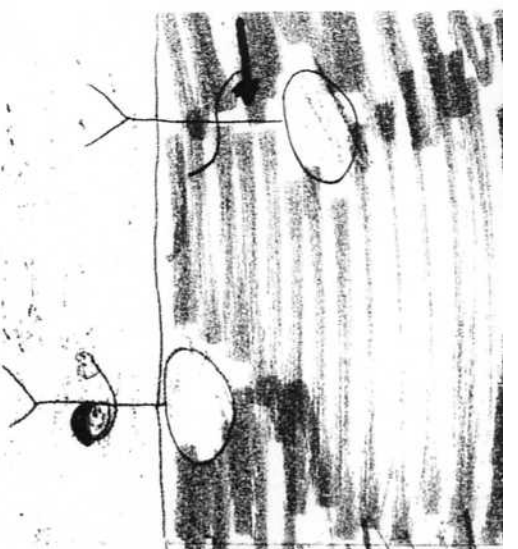

People discovered faster ways to plant crops

Factories are made to make more things faster

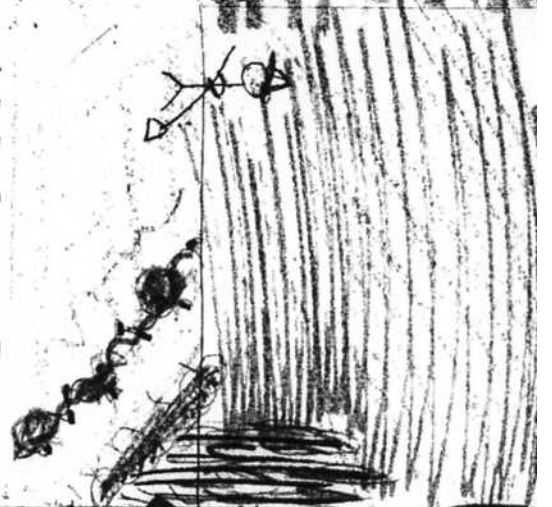

Today industrialization is faster

HUNTER / GATHERERS

people had to hunt and gather because their were no stores or trading.

AGRICULTURE

Agricultor was when people started to farm their food for not having to gather fruit and vegetables

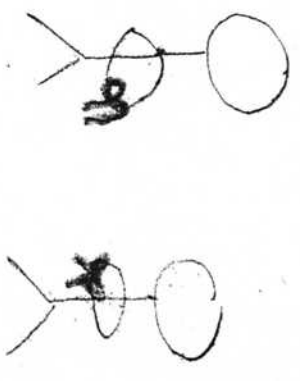

CITY LIFE

City life was formed people staid around spots where they all gathered.

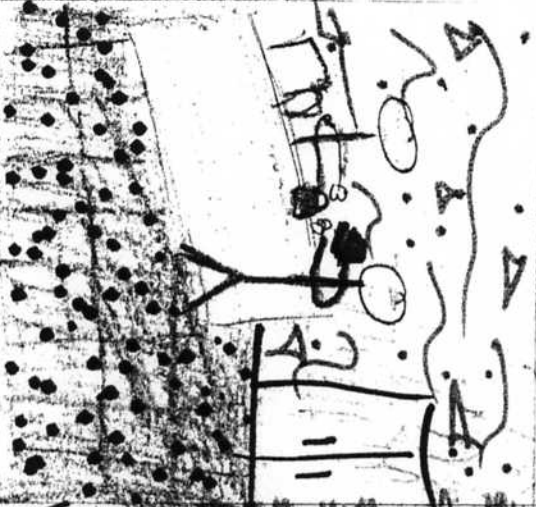

INDUSTRIALIZATION

Industrialization, all sorts o things are now this way like shoes, drinks, and clothes they get shipped all over the world.

DOMESTICATION

Domestication happend next people raised animals so that they would not have to hunt

SPECIALIZE / TRADE

Trade was very helpful, people focuse on one thing to grow or make so that they could trade for something els.

MACHINERY

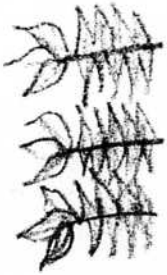

Technology was created and people used all sorts of it to farm and work.

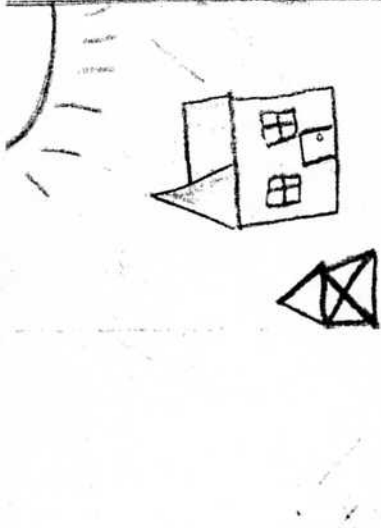

TECHNOLOGY / ENERGY

Technology is now for intertainment we have confi that can find anything w want

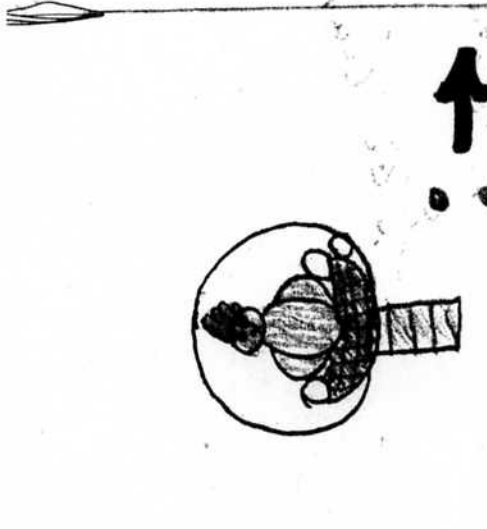

Suburber

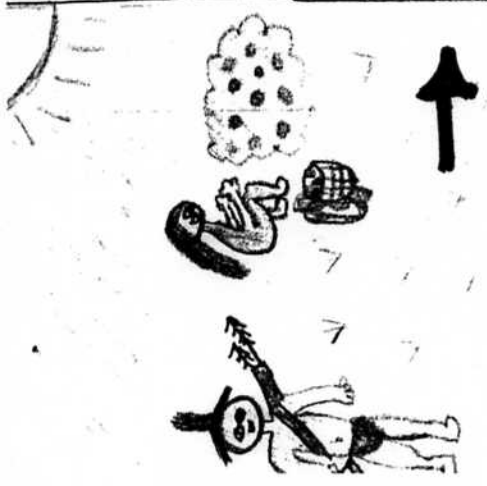

People began to specialize & make large quantities of few items

Farming & livestock provided for a more reliable food source & was reusable

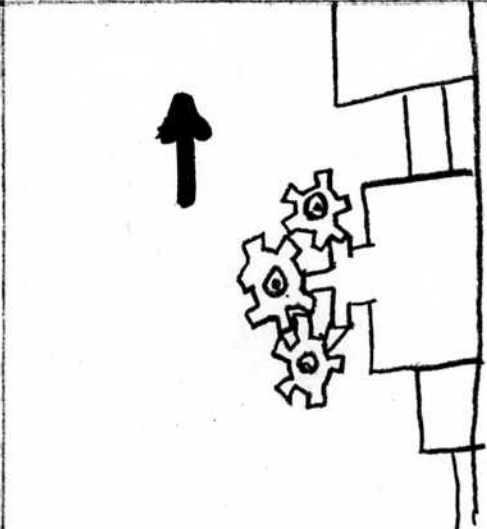

People learn domestication in which they learn to raise animals & plant crops

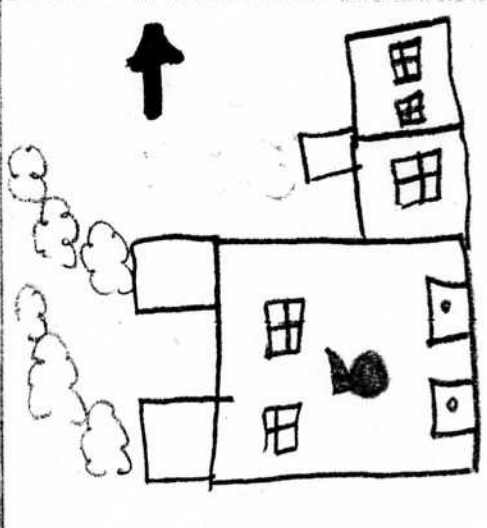

People get food by individually hunting or gathering it from the environment around them.

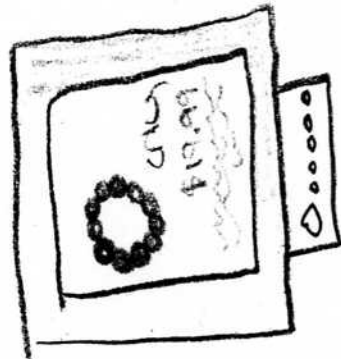

After specializing in certain things, people would trade their goods & services depending on their needs

New methods of production were discovered & invented. This was the start of technological advances.

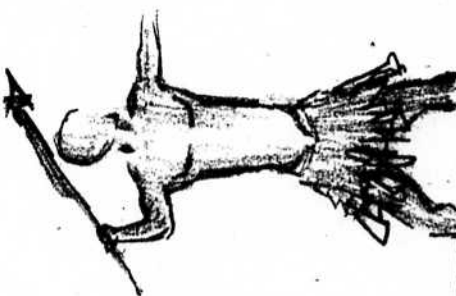

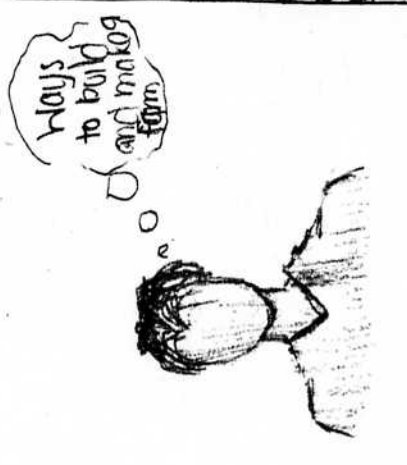

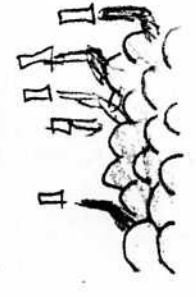

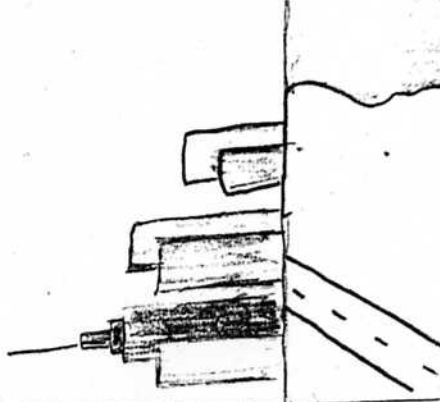

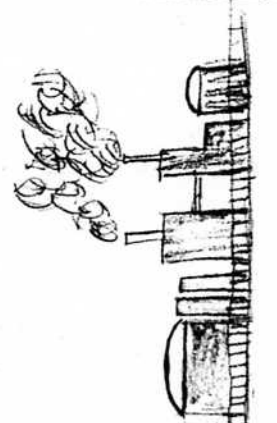

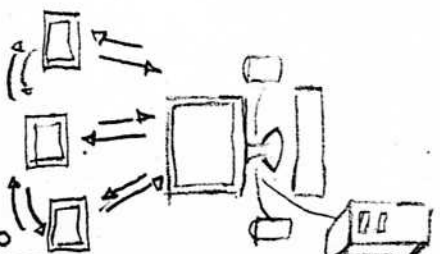

More technologies led to mass production of goods, making life more efficient.

Competition & increased technology will lead to a post-industrial / commercial society.
